PROFILE

Flutter Developer with 1 year of experience. Skilled in **Clean Architecture**, **BLOC/Cubit**, and **RESTful API**. Shipped production apps handling **concurrent token refresh** and complex multi-step flows.

EXPERIENCE

- Flutter Developer (Part-Time)** Mar 2026 - Present
[Freelance Project — Wratil](#) - Remote
- Architected a digital ecosystem for educational sessions using **Clean Architecture** and **BLOC**.
 - **Integrated Agora RTC** and **Pusher** for **real-time** interaction, enhancing user engagement.
 - Implemented an **AI-powered** advisory system leveraging **Google Gemini API**.
- Flutter Developer (Part-Time)** Dec 2025 - Feb 2026
[Freelance Project — Hala Bakeries ERP](#) - Remote
- Developed a modular **B2B ERP system**.
 - **Optimized Firestore performance** using WriteBatch, **reducing network overhead**.
 - Engineered an **RTL-compatible** document service for automated **PDF/Excel** invoice generation.
- Flutter Developer (Part-Time)** Sep 2025 - Nov 2025
[Freelance Project — Fluoro Master](#) - Remote
- Built a medical utility and educational ecosystem.
 - Managed app dependencies using **GetIt** for optimized injection.
 - Implemented secure data sync via **Retrofit/Dio** and **encrypted local storage**.

PROJECTS

- [Jobizz — Career Platform \(Graduation Project\)](#) Mar 2025 - Jul 2025
- Architected a **highly scalable** career platform using **Clean Architecture** and **BLOC/Cubit**.
 - Implemented custom **Dio Interceptors** to manage concurrent token refreshes, **enhancing session reliability**.
- [Home-Ease](#) Nov 2024 - Feb 2025
- Developed a **multi-language** mobile application.
 - Optimized UI performance and responsiveness using **ScreenUtil** and scalable **SVG** assets.
- [Ecommerce-app](#) Sep 2023 - Feb 2024
- Built a full-featured storefront with **real-time** delivery tracking and product filtering.
 - Integrated **Google Maps** and **GetX** for seamless address mapping and state management.

SKILLS

Languages & Frameworks: Dart, Flutter
Architecture & State Management: Clean Architecture, MVVM, BLOC/Cubit
Backend & Integration: RESTful APIs, Firebase, Http, Dio(Interceptors), Retrofit, Agora RTC, Pusher, Google Gemini AI
Local Storage: SQLite, SharedPreferences, Secure Storage
Software Principles: OOP, SOLID Principles, Clean Code, Responsive & Adaptive Design
CI/CD & Tools: Fastlane, Firebase App Distribution, Git, GitHub, Postman, Figma

EDUCATION

Bachelor of Computer Science (Higher Technological Institute, Beni Suef)
Grade: Excellent (85%)

Sep 2021 - Jul 2025

LANGUAGES

Arabic (Native), English (good)
